

I am a little more than upset to learn that services that I choose to pay for are in jeopardy due to the inability of "free radio" to provide the same quality, service and more importantly, variety of programming. The thought of the FCC or any other group, commission or body refusing me information that is interesting, useful and paid for is disturbing. I request that you not allow any lobbyist group to influence you with regards to limiting or taking away this service that I have chosen to pay for.
Thank you.

Jimi Misztal
